Additional Comments : The facility had 36 roll off containers with 9 marked "oil contaminated material" at the time of the site visit. Facility personnel stated that most roll off containers stored fill material from beneath the Decon liner at the former Myrick DA. START and CTEH contractors obtained duplicate samples of oily sand from 55 gallon bags. All roll offs were lined, covered and no spills were noted. No other waste management concerns were identified at the time of the visit.
